M A C O N C A M P U S

MAC Group and its suppliers – Mamiya, Leaf, Sekonic, Profoto, X-Rite, PocketWizard, Tenba, RoadWired, Multicart Transporter, Toyo-View, Cabin, and ShootSmarter – have joined together to create this MAC-on-Campus Program (M-O-C) for the educational market.

Prices are subsidized for the purpose of furthering photographic education. Our goal is to assist those involved in the process to acquire the finest quality photographic equipment in order to help achieve a higher level of photographic proficiency.

If eligible, you will be entitled to the prices shown under the M-O-C pricing. These represent substantial discounts from the dealer's regular selling prices.

Profoto®

> IDEAL FOR DIGITAL

The Profoto Acute2 offers fast recycling times and very short flash durations. It includes a fully proportional modeling light and whitelight slave.

The Profoto Acute2R is based on the Profoto Acute2 and is identical in every way with one exception: the Profoto Acute2R has a PocketWizard Digital Radio receiver built-in, to give the photographer Wireless Freedom.

Profoto ComCompact lighting systems are consistent, durable and fully compatible with all Profoto light shaping tools. In the studio or on location, Profoto ComCompact flash systems have been time proven to offer a quality and versatility no other self-contained system can offer. Their consistent power output and color temperature make these excellent strobe systems for the professional photographer, whether shooting film or digital. Profoto ProValue Packs are a better value than purchasing individual components.

Multicart® TRANSPORTER

Multicart Transporters feature a patented design that allows them to be transformed in seconds to any of eight configurations. They are ideal for moving large equipment or cases of equipment between locations, within large studios or offices, or around events. The unique Multicart design features rails, load bars and handles that hinge and slide into a variety of positions. With its quick-release adjustment hardware, the cart can be instantly reconfigured from a 2-wheel hand truck to a high-capacity 4-wheel cart, furniture dolly, platform cart, and more. This functionality also makes it possible to fold the Multicart down to a very compact size for storage and transport.

SEKONIC®

Offering a full line of precision multi-function light meters to meet every lighting challenge.

Featuring the new L-558R DualMaster the world's only meter with wireless radio triggering built inside, and L-358 Flash Master with optional plug-in wireless radio triggering. Both meters trigger flash units and/or cameras wirelessly, plus they offer flash/ambient metering at the same time, water-resistant housing, built-in 1 degree reflective spot (L-558R) and incident metering. The L-308S is the world's most compact flash/ambient meter that offers impressive features at an affordable price.

PocketWizard™

PocketWizard DIGITAL RADIO TRANSMITTERS, RECEIVERS AND TRANSCEIVERS offer the most accurate and dependable radio triggering system available. The PocketWizard MultiMAX Transceivers trigger flash, cameras or both up to 1600 ft. It includes 32 separate digitally-coded channels plus Selective Quad-Trigging. It is the only radio triggering system that offer radio confirmation on all four Quad-Zones and even confirms flash triggering with

optional flash confirmation sensor. PocketWizard Plus Transmitters and Receivers offer operating ranges up to 1600 ft. and four separate digitally-coded channels. All units employ a mini-phone connection from transmitter/receiver/transceiver to camera or flash unit for maximum reliability.

Leaf Aptus

Leaf has introduced the latest and most innovative digital camera back to date, the all new Leaf Aptus. The Leaf Aptus offers complete portability with a huge on-board display, file storage and power.

The large 3.5 inch LCD touch screen is twice as big as any other digital solution available. This is about the same size as the Leaf DP-67 screen, all without adding size or bulk to the back allowing photographers to truly evaluate composition, lighting and focus. Photographers can also use this touch screen to control all aspects of the back, from image capture and file management to editing. The intuitive interface makes it easy to do everything from creating a grey balance to the custom naming of files. The optional Leaf DP-67 can be used with the New Leaf Aptus and offers a Bluetooth solution to ensure that the art directors or clients can view the images captured up to 33 feet away from the camera.

On board image storage is accomplished through the use of CompactFlash cards (type 1 & 2). Currently, CF technology provides storage of up to 8 Gb to allow for complete portable photography. If larger storage needs exist, simply plug in a 20 Gb Leaf Digital Magazine and use as with previous Leaf backs. All the shooting and image storage settings are made using the touch screen on the back itself, without a Leaf DP-67. If that is not enough, plug in an external FireWire hard drive with power supply and shoot up to 250Gb of images without stopping!

Another new option, select the image compression that is right for you. Of course, the new Leaf Aptus always shoots 16-bit per color channel raw image files, but now, you can choose to capture the images, uncompressed as before, or capture with options for both "Lossless or Nearly Lossless" compression of the RAW file, saving space and allowing additional images to be stored on the digital storage media.

Leaf Valeo Wi

The all-new Leaf Valeo 17Wi digital back offers 17MP resolution while maintaining the 3:4 aspect ratio of the Valeo 22Wi. With near-perfect proportions for an 8x10 print, the new back takes advantage of an all-new sensor from Dalsa measuring 31.7mm x 42.3mm. With fast capture speeds of one frame every 1.2 seconds, and long burst rates of up to 12 frames untethered or up to 45 frames tethered, depending on the computer. The Leaf Valeo 17Wi is an all-round workhorse designed for the discriminating professional photographer.

The Leaf Valeo 22Wi camera back contains the largest sensor available. The 4,056 x 5,356 resolution in a sensor size of 48x36mm provides the highest image quality available and virtually eliminates moiré. Raw data files reach 125 MB in 16-bit. This large sensor provides enhanced dynamic range. Advanced imaging technologies include the 16-bit Leaf High Dynamic Range (HDR) raw data format; Leaf Double Sensor Readout (DSR) technology, and an internal memory buffer for nine fast, continuous frames.

The Leaf Valeo 22Wi and Valeo 17Wi feature new technology that allows the preview-quality images from the digital back to be sent automatically to the portable digital assistant. The DP-67 can be operated from up to 33 feet away, while maintaining all the functionality you expect from Leaf. From image capture and organization to file management, the new wireless solution does it all.

The Universal models interface directly to all mechanical and motorized Hasselblad 500 series cameras, as well as the Horseman DigiFlex II.

Leaf Mamiya ProDigital II

A one-box digital solution at an extraordinary savings. Together, the seamless integration of the latest in Leaf's high-tech digital imaging technology, coupled with the time-proven optical performance of Mamiya cameras and lenses, create the perfect marriage.

With four Leaf Mamiya ProDigital II camera models to choose from, select the resolution and workflow that is right for you.

All Leaf Mamiya ProDigital II Camera systems are offered complete with the Leaf Valeo back, Mamiya 645AFD II, Mamiya 80mm f/2.8 lens and all software and cables required for operation from a Macintosh G4 tower, G5 tower, or a G4 laptop computer. Fully compatible with the Leaf Portable Power Solution. All ProDigital II camera systems sold through the Leaf-On-Campus Program now come with a two-year warranty.

Leaf Valeo Wi & Valeo Accessories

Portable Power System

The new 20 Gigabyte Portable Power Solution is similar to the earlier 10 Gb version, however, this package includes the new DOUBLE CAPACITY 20 Gb digital magazine. This package includes a removable, battery-powered Leaf Digital Magazine, a set of two Leaf Rechargeable Batteries, charger and tripod adapter. Additionally, software, cable and waist holder for the optional DP-67 are included. Note: Initial setup for each shooting session requires either the Leaf DP-67, current compatible HP iPAQ (for more information refer to www.LeafAmerica.com), or FireWire equipped Macintosh G4 or G5 computer.

CAT. #	DESCRIPTION	STUDENT
904-306	20 Gigabyte Portable Power Solution	\$1,660
904-307	30GB Portable Power Solution	1,909

Digital Magazine

All new 20 Gigabyte Digital Magazine for the Leaf Portable Power Solution. This new double-capacity drive allows for longer shooting sessions holding:

- Leaf Valeo 6 – over 1500 full resolution uncompressed images
 - Leaf Valeo 11 – over 800 images
 - Leaf Valeo 22 – more than 400 images
- | | | |
|---------|------------------------------|---------|
| 904-312 | 20 Gigabyte Digital Magazine | \$1,162 |
| 904-313 | 30GB Digital Magazine | 1,411 |

Batteries and Battery Charger

High capacity replacement batteries for the Leaf Digital Magazine. Extra sets can be used to provide additional power for extended shooting conditions. Average battery life for new, fully charged battery set is approximately two hours. The Leaf Digital Magazine requires two batteries.

The Leaf Portable Power Battery Charger charges two batteries simultaneously. For use exclusively with the Leaf batteries above.

904-320	Leaf Portable Power Rechargeable Batteries (2-pk)	\$185
904-321	Leaf Portable Power Rechargeable Batteries (6-pk)	460

906-320	Aptus Battery	50
906-325	Aptus Battery Charger	83
906-330	AC/DC Firewire Adapter	11

Leaf Large Format Solution

The all new Leaf Valeo 22 Large Format Kit allows the use of the Valeo 22 digital camera back to be used on any 4x5 view camera equipped with a Grafluk back. This solution provides a simple way to take advantage of view camera movements with completely automated shutter control set within the Leaf Capture application.

The shutter speed and aperture can be set in 1/10 f-stop intervals, and electronic controls allow the Leaf Valeo 22 to capture accurate and consistent images.

The complete system is made up of the following components:

- Rollei Lens Control System with Lens Control Interface Cable
- Live Video Dongle
- Camera-to-Back Synch Cable

Large Format Solution requires:

- Back Adapter (Universal, Mamiya 645AFD II, Contax 645 or Hasselblad H1)
- Lens mounted for use in a Rollei Electronic Shutter

- Visit your local dealer in the USA to select the products you wish to purchase.
- Complete the application and provide the required proof-of-eligibility to your dealer with payment.
- Your dealer will place a special order for you.
- MAC will ship your order in most instances within five days to the dealer where you can pick up the merchandise.

For Leaf Purchases only:

- Select the products you wish to purchase.
- Complete the application and provide the required proof-of-eligibility.
- Mail or fax your order to Leaf America.
- If there is not a local authorized Leaf dealer, or if you do not know of such a dealer, Leaf America will refer your order to the closest authorized Leaf dealer.
- Someone from your local dealer or Leaf America will contact you to confirm your order.
- Leaf will ship your order in most instances within five days to you at the address you provide.

Terms of the Offer

This Mac-on-Campus Program (M-O-C) is designed exclusively for use by full-time photography students, full-time photography educators and accredited academic institutions teaching photographic courses, all at higher than high school level. If eligible, you may qualify for the special M-O-C prices representing substantial savings on specified products. Prices shown herein are designated M-O-C.

To qualify for M-O-C, purchaser must present completed Application to Purchase to authorized dealer and **valid identification as follows:**

- Student** – Current I.D. card and enrollment certification
- Educator** – Employment I.D. card or school curriculum with purchaser listed as instructor
- Academic Institution** – Copy of purchase order from an accredited photographic school

No consumer promotions or other discounts apply. This offer may not be combined with any other offer. The products may not be resold for a period of 24 months. Products not listed herein may be purchased at the dealer's selling price and are subject to any applicable bonus and rebate programs in effect on date of application. Mamiya America Corporation reserves the right to approve or decline Application to Purchase. Offer valid within USA only. Payment may be made by any method accepted by dealer. Educators and academic institutions may qualify for a leasing program. Please inquire. Any applicable taxes will be collected by the dealer. Prices are subject to change without notice.

YOU MUST COMPLETE THIS FORM WITH THE NAME OF THE DEALER TO ASSURE PROPER PROCESSING OF THIS APPLICATION.

I WILL PAY FOR, AND TAKE DELIVERY AT:

TIRED OF PRINTS that don't match your monitor?

Monaco/X-Rite Color Management Systems provide you with the quickest and easiest way to manage color. Award-winning MonacoEZcolor software allows you to quickly create accurate ICC profiles for your monitors, scanners and printers with its wizard-like interface. Combined with the Monaco by X-Rite OPTIX^{XR} colorimeter you can calibrate both CRT and LCD monitors. You'll eliminate trial-and-error printmaking, save ink and paper, and create great prints every time. With Monaco/X-Rite you get accuracy and control. Graphic designers, professional photographers and photo enthusiasts all agree that MonacoEZcolor is the premier color management solution.

Great prints are just an EZ calibration away!
